Lunch Boxes

It's time to start the day; don't forget to pack a lunch! Each Row of the grid contains a series of answers placed end to end, clued in order of appearance. Answers from the Boxes list must be packed into rectangular containers before being entered, from left to right and top to bottom as shown on the right. The locations of the Box entries are not given, so you must use the Row answers to place each Box. The 30 Boxes will not quite fill the grid; the remaining letters will reveal an alternative to all this packing.
